

CITY OF THOROLD

PUBLIC WORKS DEPARTMENT

ANNUAL HYDRANT INSPECTION AND FLUSHING PROGRAM

Please be advised that as of **MONDAY, MAY 3, 2010**, the City of Thorold's Operations Department will begin the Annual Hydrant Inspection and Flushing Program. This program will run for approximately 8 - 10 weeks.

All water mains and hydrants within the City of Thorold's Drinking Water Distribution Systems will be flushed and subsequently may cause temporary discolouration to your water. The Operations Department is advising residents who experience discolouration during this period to open taps and faucets within the home. The water should clear up short duration.

Your patience during this period is appreciated and should you have any questions related to the program or the safety of the drinking water in your area, please call Monday to Friday - 7:30 a.m. to 4:00 p.m. at 905-227-3535 ext. 227 or email at pubworks@thorold.com
